

**S7 Figure. Comparison of household income and race/ethnicity demographics between the study population and California population.**

A) The California population represented is from the 2020 U.S. Census Bureau American Community Survey 5-year estimates. The study population represented includes all participants who completed the survey and provided a response to the income question (75.2% of 3756, or 2825 individuals).

B) The California population represented is from the 2020 U.S. Census Bureau American Community Survey 5-year estimates. The study population represented includes all participants who completed the survey and provided a response to the race/ethnicity question (97.6% of 3756, or 3664 individuals). Native Hawaiians and Pacific Islanders were included in the Native American category in the study sample.
